

ANODYNE

FOOTWEAR CATALOG 2017

MANIFESTO

It seems everywhere we go, no matter the occasion, we're yearning for a sense of relief. A comfort in where we stand. And for many of us, it's not just where we stand. It's how we stand and what's keeping us going. It's easy to forget (and neglect) what allows us to stay active and on to our next venture. After all, the root of what keeps us stable, upright, and moving, is our feet.

An anodyne, by definition, is something that brings you a sense of soothing and comfort. The comfort we desire (and in some cases need) is unique to each of us. We believe that you deserve shoes that will meet your comfort and style needs, and allow you to maintain an active, healthy and productive lifestyle.

ANODYNE

Built for comfort. Designed for style.

Built for comfort.

STYLING

With Anodyne, you genuinely want to wear your shoes. The materials we've used and designers we've engaged have succeeded in bringing you a product that will effectively address both your aesthetic desires and comfort needs.

COMFORT

- Light Weight Outsole - all day comfort, increased durability
- Padded collar - an alternative to leather, our collars prevent possible irritation where the material meets your ankle
- Padded tongue - prevents foot slippage and ensures proper fit
- Lining - we've designed all styles with the absolute minimum number of seams. By avoiding excess seams, you lower the risk of possible irritation and complication.

Optimal construction for people with diabetes or foot sensitivity.

PROTECTION

A

No Metal - metal can often irritate and damage the skin, and in rare cases, sewing needles and staples may accidentally be left in shoes and, in turn, cause serious damage. Recognizing this potential hazard, we've circumvented any such exposure by eliminating absolutely all metal components from our shoes. In addition, every pair of shoes is run through a metal detector prior to shipping.

B

Antimicrobial Treatment - in order to ensure our shoes are 100% hygienic, we spray the inside of every pair with our proprietary, Anti-microbial Protectant before shipping. This 100% natural, anti-fungal and anti-microbial process reduces 99.9% of germs, virus and bacteria exposure.

C

Additional, Precautionary Components - each of the following shoe components, carefully incorporated into each design, help maintain the durable structure of the shoe while protecting the feet and preventing potential injury.

- Extra Depth - accommodates for swelling, and placement of orthotic/insert (5/16 in extra depth)
- Protective Toe Box - protects toes
- Shank - adds extra support to arch area of shoe
- Heel counter - provides maximum foot support by cradling the heel to reduce over-pronation and prevent heel slippage

<div><div><div>EST. 2015</div><div><div>R</div><div>X</div></div><div>SHOE MFG</div></div><div>ANODYNE LABORATORY</div></div> <div></div>	<div>DESCRIPTION</div> <div>Custom Inserts and Partial Foot Toe Fillers</div> <div>Hand-crafted by our lab staff and based on the exact contours of a patient's feet, our Custom Accommodative Inserts and Partial Foot Toe Fillers allow for maximum foot support, total contact and enhanced stabilization. Moreover, our custom inserts can be used to isolate and individually treat any particular irregularity that a patient's feet may have. We're capable of adding any sort of special accommodation to a patients inserts, including the off-loading of certain areas, adding metatarsal pads, arch flanges, Morton's extensions, heel raises, etc.</div>
	<div>SCANNER</div> <div>Working with a team of industry experts, we've developed an ultraportable, easy-to-use, and affordable 3D scanner. With accuracy within +/- .5 mm, there is no longer a need for impression foam boxes or plaster casts. Orders can be sent and received within minutes, eliminating shipping charges and reducing lead times. Our scanning software is offered to all Anodyne suppliers free of charge (no fees or click charges).</div>
